# About Us

The MSC Summit & Awards has gone virtual!

We are thrilled to offer the same calibre of executive experience, in a virtual setting

COVID-19 has changed the way businesses, economies and societies are operating. Working in close contact with our clients, we found it essential to continue to provide an environment for the supply chain community to collaborate and communicate. The 10th Edition of Manufacturing Supply Chain Summit, offers an integrated portfolio of leadership networking, information & professional development sessions for industrial executives in India. Our mission is to help senior executives define & shape a better future for themselves, their organizations and the industry at large.

We would be hosting "10th Manufacturing Supply Chain Awards 2021" on the same day in the evening post the conference. The entire event and the awards ceremony would be virtual and hosted on a digital platform. The summit would have live sessions throughout the day, whereas the awards segment would be pre-recorded with the jury members and award winners. We would have 50+ speakers and 500+ attendees.

JOIN US FOR THE  
**OPPORTUNITY TO**

- 01.** Ensure your business process delivers across all levels in the organisation through the latest in strategy, planning and change management techniques
- 02.** Validate your strategic vision & investment decisions with industry leaders
- 03.** Create value through process improvements by leveraging the latest technology
- 04.** Learn & benchmark from other companies - know the best practices & market trends
- 05.** Streamline your operational process and align these process with your overall business strategy
- 06.** Explore new collaboration opportunities & increase your points of presence in India
- 07.** Interact and forge relationships with lean six sigma Professionals
- 08.** Play your part in demonstrating India as a manufacturing powerhouse

WHY YOU  
**MUST ATTEND?**

## **01. Develop New Leadership for Manufacturing 4.0**

Be prepared for the future state of manufacturing where new rules of leadership will prevail. Gain applicable insights into successful employee engagement for a new generation.

## **02. Access Innovative Ideas and Emerging Trends**

Feel the pulse of the manufacturing state of business while gathering ideas of the future technologies, trends and user expectations. Find solutions to real business problems by interacting with your peers and gaining a view into the future of manufacturing and supply.

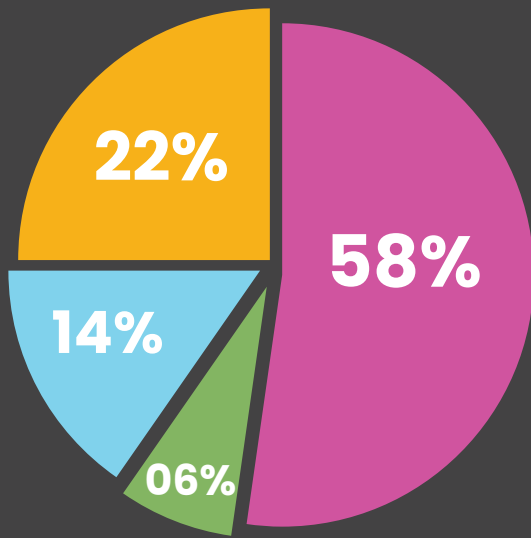

## **03. Plan for the Future State**

Success today depends upon a deft marriage of new business models and game-changing technologies. Get inspiration and imagine highly intelligent, agile information-driven factories and dynamic teams that can respond rapidly to change.

## **04. Learn through Collaboration**

The culture of the Summit has been described as "welcoming, engaged and passionate". Benefit from the intimate setting of the Summit, which inspires openness and sharing about the strengths and opportunities on others' journey so far.

# Executive people / who will participate

**58%** **Executive**  
(Senior Directors, Vice president & General Managers)
